REPORT.

TO THE RIGHT HON.
LORD BALFOUR OF BURLEIGH.

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,
EDINBURGH, 5th August 1897.

MY LORD,

I had the honour in 1896, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 90, to transmit to you, as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1895, along with the usual Explanation and Commentary.

At the same time my Thirty-first Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1895).

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

REPORT

TO THE RIGHT HON.
SIR JOHN RUSSELL

BY
THE SECRETARY OF STATE

GENERAL SECRETARY OF THE
OFFICE OF THE SECRETARY OF STATE

1855

I have the honour to acknowledge the receipt of your letter of the 17th inst. in relation to the report of the Committee on the subject of the proposed extension of the British North America Act, and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
J. RUSSELL

I have the honour to acknowledge the receipt of your letter of the 17th inst. in relation to the report of the Committee on the subject of the proposed extension of the British North America Act, and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I have the honour to acknowledge the receipt of your letter of the 17th inst. in relation to the report of the Committee on the subject of the proposed extension of the British North America Act, and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

Yours obedient servant,

J. RUSSELL

The male births number 64,799, and the female 61,695, the former exceeding the latter by 3104. The births outnumber the deaths during the year by 44,642. The number of illegitimate births registered is 9,204, equivalent to 7·28 per cent. of the total births, almost the same as last year when the rate was 7·29 per cent. The male illegitimates are 4713, the female 4491.

The births are distributed as follows throughout the five Registration Districts: in the Principal Town Districts the total number is 52,830, of these 27,067 are males and 25,763 females together giving a birth rate of 3·16 per cent.; in the Large Town Districts they number 17,633, males 8987, females 8646, together affording a birth rate of 3·23 per cent.; in the Small Town Districts, they are 27,729, males 14,211 females 13,518, at the rate of 3·13 per cent.; in the Mainland Rural Districts they are 25,462, males 13,045, females 12,417, a rate of 2·74. per cent. and in the Insular Rural Districts, they are 2840, males 1489, females 1351, together giving a birth rate of 2·30 per cent. (Tables VIII. and IX).

These same tables show that of the illegitimate births 3592 were registered in the Principal Town Districts, being in the ratio of 6·80 per cent. of the total births in the same,—males 1814, females 1778; in the Large Town Districts they total to 1068, or 6·06 per cent. of all,—males 571, females 497; in the Small Town Districts they are 1913, or 6·90 per cent. of all,—males 991, females 922; in the Mainland Rural Districts they are 2457 in all, and form 9·65 per cent. of the total births in the same,—males 1234, females 1223, and in the Insular Rural Districts they amount to 174, being 6·13 per cent. of all,—males 103, females 71. In other words 1 in every 15 of the children was born out of wedlock in the Principal Town Districts, 1 in every 16 in the Large Town Districts, 1 in every 14 in the Small Town Districts, 1 in every 10 in the Mainland Rural Districts, and 1 in every 16 in the Insular Rural Districts; while for all Scotland 1 in every 14 come under the same category.

In the Principal Towns as seen in Table V. the highest ratio of illegitimate births is in Aberdeen, where 9·32 per cent. of the whole are without the bonds of matrimony; in Dundee the rate is 8·69 per cent.; in Edinburgh 8·41 per

TABLE V.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1895, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

During the year 1342 mothers bore twins at a birth, and in 12 cases triplets, so that of the total mothers bearing children, in all 125,128, one in every 93·2 bore twins, and 1 in every 10,427 bore triplets.

The births were registered throughout Scotland during each month as follows :—8·92 per cent. during May, 8·89 per cent. during July, 8·80 per cent. during January, 8·61 per cent. during March, 8·42 per cent. during June, 8·36 per cent. during October, 8·29 per cent. during August, 8·11 per cent. during April, 7·93 per cent. during September, 7·72 per cent. during February, 7·52 per cent. during November, and 7·43 per cent. during December.

The birth-rate for each ten thousand of estimated population in the following European states for the present year is, 415 in Hungary, 386 in Austria, 368 in Prussia, 361 in the German Empire, 351 in Italy, 328 in the Netherlands, 305 in Norway, 302 in Denmark, 285 in Belgium, 280 in Switzerland, and 219 in France.

MARRIAGES.

The number of marriages registered throughout Scotland during 1895, is 28,422, being 818 of an increase upon those during the previous year, and affording a marriage rate of 68·39 in every ten thousand of the inhabitants as estimated. The mean average rate for the last ten years, 1885–1894, is 66 per ten thousand. The rate for England during the present year is 75 per ten thousand.

The rate varies much in the different primary registration districts being 84 per ten thousand of the population in the Principal Town Districts, 66 in the Large Town Districts, 62 in the Small Town Districts, 52 in the Mainland Rural Districts and 39 in the Insular Rural Districts. (Table VI.)

This table also shows how the rate varies in each county in Scotland, from 80·13 per ten thousand of the population of Lanark, the highest, to 30·57 the lowest, in Sutherland. In but four counties the rate is above that for Scotland as a whole, viz. 70·38 per ten thousand in Ayr, 73·06 in Aberdeen, 79·85 in Edinburgh, and 80·13 as mentioned above in Lanark. The lowest rates occur in Ross and Cromarty, 44·98 per ten thousand of population, 41·78 in Nairn, 39·03 in Bute, 36·14 in Argyll and 30·57 in Sutherland.

TABLE IX.—Proportion of Births in 1895. Percentage of Births to Population, and of Illegitimate to the Total Births; also the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; with the Proportion of Mothers who bare Twins and Triplets in Scotland, and its Five Groups of Districts in 1895.

FIVE GROUPS OF DISTRICTS.	Per-centage of Births to Population.	Per-centage of Illegit. to Total Births.	Proportion of Males to every 100 Females in the			Proportion of MOTHERS who bare TWINS. — One in every	Proportion of MOTHERS who bare TRIPLETS. — One in every
			Total Births.	Legitimate Births.	Illegit. Births.

SCOTLAND . . .	3·044	7·28	105·0	105·0	104·9	93·2	10427

Table V. indicates the number of marriages and the corresponding rates in each of the Principal Towns in Scotland, the latter being 88·5 in every ten thousand of the population in Glasgow, 86·6 in that of Edinburgh, 75·2 in that of Dundee, 90·2 in that of Aberdeen, 65·3 in that of Govan and Partick, 81·3 in that of Leith, 77·5 in that of Paisley, 79·9 in that of Greenock, 71·5 in that of Coatbridge, 88·4 in that of Perth, and 83·7 in that of Kilmarnock.

The fertility of each marriage is computed in the usual manner. The number of marriages registered in Scotland during the year 1889 was 26,344, and the legitimate births during the year under review are 117,290, so that $\frac{117,290}{26,344}$ gives 4·45 as the average fertility of each marriage, or 445 children were born to every 100 marriages.

Tables X., XI., and XII. afford information as to the numbers and proportions of marriages as performed in Scotland and in its five primary registration districts in accordance with the rites of the chief religious denominations. Thus, of the 28,422 celebrations throughout Scotland, 12,832 were performed by clergy of the Established Church, 5496 by those of the Free Church, 3051 by those of the United Presbyterian Church, 2855 by those of the Roman Catholic Church, 870 by those of the Episcopal Church, 2075 by those of other denominations than the above, while 1243 of the marriages were irregular. In other words, 45·15 per cent. of the whole were performed in accordance with the forms of the Established Church, 19·34 per cent. with those of the Free Church, 10·73 per cent. with those of the United Presbyterian Church, 10·05 per cent. with those of the Roman Catholic Church, 3·06 per cent. with those of the Episcopal Church, 7·30 per cent. with those of other denominations, and 4·37 per cent. of them were irregular, this being a somewhat higher proportion than for last year. On summing up the total number of marriages registered in Scotland, as also those by each denomination since official registration commenced in 1855, it is found that, of the whole, 45·50 per cent. were solemnised by clergy of the Established Church, 21·75 per cent. by those of the Free Church, 12·81 per cent. by those of the United Presbyterian Church, 9·36 per cent. by those of the Roman Catholic Church, 2·48 per cent. by those of the Episcopal Church, 6·32 per cent. by ministers of other denominations, while 1·56 per cent. of all were irregular in their character.

TABLE X.—Marriages, 1895. Number of Marriages contracted in Scotland and its Five Groups of Districts according to the Rites of the several Religious Denominations, and their Proportion to the Total Marriages in each Group.

In Table Xa. is given the number of marriages and their proportions according to these various denominations in each County and Principal Town in Scotland for the year 1895. In 21 Counties 50·00 per cent. or over of the marriages registered therein are under the auspices of the Established Church, the highest rate occurring in Shetland 66·92 per cent., Kirkcudbright 73·93 per cent., Kincardine 75·26 per cent., and Wigtown 77·37 per cent., the lowest rate being in Sutherland 18·46 per cent. and Ross and Cromarty 15·06 per cent. Free Church marriages were performed in greatest proportion in Caithness to the extent of 50·00 per cent., in Ross and Cromarty to the extent of 75·00 per cent., and in Sutherland to 80·00

TABLE Xa.—Marriages, 1895. Number of Marriages contracted in Scotland and each of the Counties and Principal Towns according to the Rites of the Several Religious Denominations, and their proportions to the Total Marriages in each.

As regards the towns, in Leith 48·65 per cent., and in Aberdeen 53·40 per cent. of the marriages fall to the Established Church; the lowest rates occurring in Glasgow 31·07 per cent., and Coatbridge 21·03 per cent. The highest ratio of marriages appertaining to the Free Church occurs in Aberdeen 22·06 per cent., and Kilmarnock 25·00 per cent.; the lowest in Greenock 17·94 per cent., Paisley 17·12 per cent., and Glasgow 16·67 per cent. Marriages as performed by ministers of the United Presbyterian Church are most marked in Leith 12·80 per cent., Glasgow 13·22 per cent., and Paisley 14·05 per cent.; least so in Greenock 6·25 per cent., and Aberdeen 5·56 per cent. In Greenock 18·75 per cent., and in Coatbridge 35·62 per cent., of the ceremonies fall to the Roman Catholic Church, these being in lowest proportion in Perth 3·73 per cent., and Aberdeen 2·15 per cent. Marriages as performed by clergy of the Episcopal Church are in greatest proportion in Perth 7·09 per cent., Dundee 7·80 per cent., and Edinburgh 7·93 per cent.; being least in Glasgow 2·40 per cent., and Coatbridge 2·15 per cent. Marriages falling under other denominations bulk most prominently in Glasgow 11·03 per cent., Paisley 11·71 per cent., and Dundee 12·12 per cent.; least so in Edinburgh 5·74 per cent., and Kilmarnock 4·84 per cent. Irregular marriages in those towns are most in repute in Edinburgh 10·08 per cent., and Glasgow 11·27 per cent.; least so in Kilmarnock 1·61 per cent., Paisley 1·44 per cent., and Coatbridge 0·86 per cent.

Tables XIII. and XIV. indicate the ages at which marriage was entered upon by the husbands and wives during the year. In the 28,422 marriages all the men but six, and all the women less seven, stated their age on the occasion. 1672 of the husbands and 5293 of the wives were under 21 years

of age on entering the state of matrimony. Two of the bridegrooms were between 16 and 17, and 21 between 17 and 18 years of age; while 6 of the brides were between 15 and 16 years, and 52 between 16 and 17 years of age at marriage. Thirty-one of the husbands were over 70 years of age, one a widower being 83; and 7 of the wives were of like age, one, a widow, admitting to the advanced age of 80 on re-entering the marriage state.

Table XIV. gives the percentage of men and women at different ages who married in Scotland and in its five groups of districts during 1895. Thus, in Scotland, 2·23 per cent. of the men who married were under 20 years of age, 10·38 being the percentage of the women at like age, ratios exceeded in the case of the former in the Principal and Large Town Districts, and in that of the latter in the Principal Town Districts. Between 20–25 years 34·31 per cent. of the men, and 44·94 per cent. of the women married, ratios exceeded in both cases in the Large and Small Town Districts. At ages between 25–30 years 33·42 per cent. of the men, and 26·45 per cent. of the women married in Scotland, proportions exceeded

in the case of the former in the Small Town and Mainland Rural Districts, and in that of the latter in the two Rural Districts. 14·66 per cent. of the husbands and 9·55 per cent. of the wives who were united in matrimony throughout the country were between 30–35 years of age, exceeded in the case of both sexes in the two Rural Districts. Between the age of 35–40 years 7·05 per cent. of the men, and 4·49 per cent. of the women married, proportions exceeded in the case of the former in the Rural Districts, and of the latter in the same, as also in the Principal Town Districts. In 3·47 per cent. of the marriages in Scotland the husbands were between 40–45 years of age, the percentage in the case of the wives being 2·09, exceeded as to the former in the Principal Town Districts, and the two Rural, and in that of the latter, in the Principal Town Districts. Between 45–50 years, 2·07 per cent. of the husbands married, 1·12 being the corresponding percentage among the wives. While at ages above 50 years, 2·77 per cent. of the men entered the conjugal state, 0·96 per cent. of the wives doing the same.

The number of bachelors who married spinsters in Scotland during the year is 24,745, while 769 bachelors espoused widows, 2118 widowers mated with spinsters, and 780 widowers united themselves with widows. In other words, 87·06 per cent. of the marriages were between bachelors and spinsters, 2·71 per cent. between bachelors and widows, 7·45 per cent. between widowers and spinsters, and 2·74 per cent. between widowers and widows.

Table XVIII. gives the proportions of those of both sexes marrying during the year, and who, upon that occasion, signed the marriage register in writing, or made use of *mark*. In Scotland 97·37 per cent. of the men, and 95·74 per cent. of the women, wrote their names, leaving 2·63 per cent. of the former, and 4·26 per cent. of the latter, who used *mark*. In the Principal Town Districts 97·42 per cent. of the husbands, and 95·31 per cent. of the wives, signed their names; in the Large Town Districts the corresponding percentages are 97·28 and 96·55 respectively; in the Small

of the men, and 73·14 per cent. of the women, signed, leaving 14·26 per cent. of the former, and 26·86 per cent. of the latter, who presumably were unable to write.

In twelve of the counties a greater proportion of the husbands used *mark* than was the case with them for all Scotland, viz., 2·74 per cent. in Bute, 2·91 per cent. in Clackmannan, 3·03 per cent. in Renfrew, 3·72 per cent. in Haddington, 3·74 per cent. in Lanark, 3·79 per cent. in Linlithgow, 4·03 per cent. in Dumbarton, 4·49 per cent. in Caithness, 4·58 per cent. in Argyll, 9·94 per cent. in Ross and Cromarty, 10·77 per cent. in Sutherland, and 11·32 per cent. in Inverness. In Nairn, Kincardine, Kinross, and Peebles, every man married during the year signed his name. In twelve counties a larger proportion of the women who married during 1895 signed by *mark* than was their mean for all Scotland, viz., 4·54 per cent. in Renfrew, 4·62 per cent. in Shetland, 4·95 per cent. in Forfar, 5·38 per cent. in Dumbarton, 5·41 per cent. in Kinross, 5·62 per cent. in Caithness, 5·68 per cent. in Lanark, 5·71 per cent. in Nairn, 6·34 per cent. in Argyll, 9·23 per cent. in Sutherland, 20·79 per cent. in Inverness, and 26·42 per cent. in Ross and Cromarty. In Selkirk alone did all the wives sign the marriage register.

The two cities Edinburgh and Glasgow are in like manner referred to. In Edinburgh 99·32 per cent. of the husbands, and 98·52 per cent. of the wives married during the year wrote their names, leaving 0·68 per cent. of the former, and 1·48 per cent. of the latter, who made use of *mark*, the corresponding ratios in Glasgow being 96·61 per cent. and 93·52 per cent. as signing, and 3·39 per cent. and 6·48 per cent. as using *mark*.

14·95 per cent. of the marriages are registered in June, 13·13 per cent. in December, 12·16 per cent. in July, 11·18 per cent. in January, 8·05 per cent. in April, 7·33 per cent. in November, 7·10 per cent. in September, 6·69 per cent. in October, 6·08 per cent. in August, 5·30 per cent. in March, 4·91 per cent. in February, and 3·12 per cent. in May.

The marriage rate for each ten thousand of estimated population in the under-noted European States during the year 1895 is as follows:—64 in Norway, 71 in Denmark and France, 73 in The Netherlands and Italy, 75 in Switzerland, 77 in Belgium, 79 in the German Empire, 80 in Prussia, 81 in Austria, and 84 in Hungary.

DEATHS.

During the year under review, 81,852 deaths were registered throughout Scotland, which gives a mortality rate of 197 in every ten thousand of the population as estimated, or one death in every 51 of the inhabitants. Of these, 40,663 are of the male sex, and 41,189 of the female. The number of deaths during the present year is greater than that for 1894 by 10,739, and is, with the exception of 1891, the greatest number registered during any year since these reports commenced. The mortality rate among the males alone is for the present year 203, and among the females 192 in every ten thousand of the sexes respectively. The mean death-rate for the last ten years is 190 per ten thousand of the population of the country.

Tables XIX. and XX. give the number of deaths, male and female, and their equivalent mortality rate in each of the five great Registration Districts. In the Principal Town Districts the male deaths number 18,203, being at the rate of 228 in every ten thousand of the population, the female being 18,460 in number, and 211 in like proportion. In the Large

Town Districts the male deaths are 5502, in the ratio of 206 as above; the corresponding numbers for the female being 5390 and 193. The male deaths in the Small Town Districts are 8138, equal to 190 per ten thousand; the female 8316, and in ratio 182. In the Mainland Rural Districts the deaths of the males are 7922, their proportion as above being 174; the corresponding figures in the case of the females being 8029 and 170. In the Insular Rural Districts while the male deaths are 898 in number and equal to 156 per ten thousand of the inhabitants of the same sex dwelling in these parts; the female exits are 994, or in the proportion of 150. The rate is thus considerably higher in the Urban than in the Rural Districts, being in the former 245 in every ten thousand of the population of the same, and in the latter 159. The rate for the sexes combined, and also for the sexes respectively, is in the Principal Town Districts and Large Town Districts higher than the corresponding for Scotland, and in each district the male death-rate is greater than that of the female.

Tables XXI. and XXII. give the deaths and proportionate mortality of the same in each of the Principal Towns of Scotland. Thus, in Glasgow, the total deaths registered during 1895 number 16,344, which is equivalent

TABLE XIX.—Deaths of Males and Females in Scotland, and its Five Groups of Districts, during each of the Years 1855-1895.

to a mortality rate of 23 per thousand of its inhabitants as estimated; in Edinburgh the deaths number 5679, and the corresponding rate is 21; in Dundee the deaths are 3399, and the rate 21; in Aberdeen they are 2817, a rate of 21; in Govan and Partick they number 1936, or at a rate of 18; in Leith they amount to 1487, at the rate of 20; in Paisley they are respectively 1548 in number, and 22 in rate; in Greenock they are 1432, at the rate of 23; in Coatbridge they are 790, giving a rate of 24; in Perth they are 631, a rate of 21; and in Kilmarnock the deaths in all number 600, the mortality rate being 20 per thousand of the population as estimated.

Tables XXIII. and XXIV. give the number of deaths at a series of ages for each sex, and the percentage of the same to those estimated to be alive at like ages for Scotland, and for its five Primary Registration Districts. Thus, of children alive in Scotland under one year of age, 16·872 per cent. of the males, and 13·435 per cent. of the females, died during the year, proportions which are exceeded in the case of both sexes in the Principal Town Districts and Large Town Districts, most so in the former, where 19·895 per cent. of the male infants, and 15·844 per cent. of the female

died at this early age. The mortality rate falls gradually in the Small Town and two Rural Districts, being at its lowest in the Insular-Rural Districts, viz., 8·980 per cent., and 6·483 per cent. for the respective sexes. In each district the male rate is higher than the female.

Under two years of age, the death-rate for Scotland had declined to 6·268 per cent. in the case of the males, and 5·959 per cent. in that of the females, ratios exceeded, and for both sexes, in the Principal and Large Town Districts. The lowest rate is in the Insular-Rural Districts, where for the males it is 2·340 per cent., and for the females 2·379 per cent. The female mortality rate is in the two Rural Districts a little above that of the male.

Under three years of age, the death-rate for Scotland is for the males 2·350 per cent., and for the females 2·372 per cent., ratios exceeded in both sexes in the Principal Town Districts. In Scotland, in the Small Town Districts, and in the Mainland Rural Districts, the female rate is higher than that of the male.

Under four years of age, the death-rate for the males throughout Scotland is 1·440 per cent., and for the females 1·321 per cent., which are exceeded in the case of both sexes in the Principal Town Districts, and in that of the females in the Small Town Districts. In the Small Town Districts the female rate is higher than that of the male.

Under five years of age, the male mortality rate in Scotland is 0·912 per cent., the female 0·952 per cent., ratios exceeded in the case of both sexes in the Principal Town Districts, and of the males in the Large Town Districts. In the Principal Town Districts, and both Rural, the female rate is above the male.

At all ages under five years, the death-rate for the males in Scotland is 5·753 per cent., and for the females 4·932 per cent. of those presumably

alive at the same age, ratios exceeded as to both sexes in the Principal and Large Town Districts ; the lowest rates are in the Insular-Rural Districts, viz., 2·517 per cent. and 2·090 per cent. In each district the male death-rate is above the female. During the next quinquennial period 5–10 years, the rates have fallen in Scotland to 0·515 per cent. in the case of the males and 0·505 per cent. in that of the females, exceeded in the Principal Town Districts for both sexes, and for the males alone in the Large Town Districts. Between 10–15 years the death-rate reaches its lowest, 0·344 per cent. for the males in Scotland, and 0·373 per cent. for the females, exceeded somewhat for both sexes in the Principal and Large Town Districts, and for the males in the Small Town Districts. Between 15–20 years, the death-rate for the males is 0·557 per cent., and for the females 0·548 per cent., in each case exceeded in the three Urban Districts. Between 20–30 years the male mortality rate for Scotland is 0·783 per cent., and the female 0·712 per cent., exceeded in the case of both sexes in the Large Town Districts, of the males in the Small Town Districts, and Insular-Rural Districts, and of the females in the Principal Town Districts. Between 30–40 years the male death-rate for Scotland is 1·00 per cent., the female 0·981 per cent., exceeded for both sexes in the Principal Town Districts, and for the females, in the Large Town Districts. From 40 years onwards the death-rate for both sexes gradually increases. The male death-rate for Scotland at all ages is 203 per ten thousand of the same sex, the female rate is 192. In the Principal Town Districts the corresponding proportions are 228 and 211; in the Large Town Districts they are 206 and 193; in the Small Town Districts they are 190 and 182; in the Mainland Rural Districts they are 174 and 170; and in the Insular-Rural Districts the male mortality rate is 156, the female 150 in every ten thousand of the inhabitants as estimated.

Tables XXVI. and XXVII. refer to the Principal Towns in Scotland, the former giving the number of deaths in each town at the different age periods of life, the latter the proportions of the same to those alive at

TABLE XXV.—Percentage of Deaths at each Age to the Total Deaths in 1895.

[illegible]

corresponding ages. At ages under one year the highest death-rate was in Aberdeen, where in every hundred infants of that age 20·57 died, followed by Dundee with 20·38, Kilmarnock with 19·59, Leith with 19·03, Greenock with 18·63, Edinburgh with 17·84, Glasgow with 17·65, Coatbridge with 17·39, Perth with 16·86, Paisley with 15·25, and Govan and Partick with 14·02. During the second year of life, Coatbridge shows the heaviest mortality of 12·09 per hundred, followed by Glasgow with 9·57, Leith with

The death-rate per ten thousand of the estimated population of the undernoted European States during the year 1895 is as follows :—296 in Hungary, 276 in Austria, 252 in Italy, 223 in France, 222 in the German Empire, 218 in Prussia, 197 in Switzerland, 195 in Belgium, 186 in the Netherlands, 169 in Denmark, and 156 in Norway.

CAUSES OF DEATH.

The number of deaths registered throughout Scotland during the year is 81,852, in 528 of which the cause was so ill defined, or specified in such a manner as not to be available for statistical purposes.

The death-rate of the country as a whole and for both sexes together is 197 per hundred thousand of the inhabitants as estimated to the middle of the year, that for the males being 203, and for the females 192. The highest death-rate occurs in the Principal Town Districts, 219 per

hundred thousand of the population of the same, the lowest in the Insular-Rural Districts, 153, in like proportion.

During the year the number of deaths registered as due to Zymotics is 11,450, which is 2194 more than was ascribed to the same during the previous year, and is in the proportion of 278 in every hundred thousand of the population, and forms 14·10 per cent. of all the specified deaths. In each of the Urban Districts the rate for Scotland is exceeded, being 324 per hundred thousand of the population in the Principal Town Districts, 281 in the Large Town Districts, and 279 in the Small Town Districts. The lowest rate is in the Mainland-Rural Districts, 198, that in the Insular-Rural Districts being 221, and in the Rural Districts the female death-rate is higher than the male (Tables XXVIII. and XXIX.).

Table XXXII. gives the number and proportion of deaths from the chief Zymotic diseases and from ordinary causes, so arranged as to exhibit the mortality due to each during five life periods. Thus of the whole 11,450 deaths from Zymotics at all ages, 7085 occurred during the first five years of life, 678 between 5–10 years, 214 between 10–15 years,

2030 between 15-60 years, and 1443 at greater ages, so that 69·7 per cent. of the total deaths from Zymotics occurred during the first fifteen years of life; and Table XXXIII. shows that of the total mortality in Scotland 24·98 per cent. of the deaths registered as occurring at ages under 15 years are due to Zymotics, 6·96 being the percentage of the same at ages over 15 years.

Diarrhœa and Dysentery caused 2308 deaths during the year in Scotland, of which 1715 or 74·3 per cent. succumbed during the first five years of life, 21 during the next five years, 18 between 10-15 years, 205 or 8·9 per cent. between 15-60 years, and 349 or 15·1 per cent. at greater ages. Measles caused 2063 deaths during the year, and of these 1914 or 92·8 per cent. were fatal to children under five years of age, 125 or 6·1 per cent. dying during the next quinquennial period, 5-10 years. Hooping Cough caused 1948 deaths, 1860 or 95·5 per cent. of all during the first five years of life, 82 or 4·2 per cent. between 5-10 years, 2 between 15-60 years, and 4 at greater ages. Influenza caused 1752 deaths in all during the year, 142 or 8·1 per cent. during the first five years of life, 27 during the next five years, 23 between 10-15 years, 622 or 35·5 per cent. between 15-60 years, and 938 or 53·5 per cent. at ages above 60. Continued Fevers caused 792 deaths, 543 or 68·5 per cent. of them between 15-60 years. Typhoid or Enteric caused 730 deaths, 503 or 68·9 per cent. of these between 15-60 years of age, 81 or 11·1 per cent. between 10-15 years, 63 or 8·6 per cent. between 5-10 years, 54 or 7·4 per cent. during the first five years of life, and 29 or 4·0 per cent. at the other extreme of life, *i.e.* at ages above 60 years. Typhus Fever caused 34 deaths, 31 of these at ages between 15-60 years; Cerebro-Spinal Fever caused 6 deaths, and Simple or Ill-defined Fever 22. To Scarlet-Fever 782 deaths are ascribed, of which 469 or 60·0 per cent. are registered as occurring during the first five years of life, 191

TABLE XXXII.—Number and Proportion of Deaths at different Ages from the Zymotic and Ordinary Diseases in Scotland in 1895.

or 24.4 per cent. between 5-10 years, 43 or 5.5 per cent. between 10-15 years, 78 or 10.0 per cent. between 15-60 years, and 1 at a greater age. Diphtheria caused 744 deaths, 531 or 71.4 per cent. of these during the first five years of life, 149 or 20.0 per cent. between 5-10 years, 23 or 3.1 per cent. between 10-15 years, 39 or 5.2 per cent. between 15-60 years, and 2 at ages over 60. Small-pox caused 47 deaths, 4 of these occurring during the first five years of life, 3 between 5-10 years, 38 or 80.9 per cent. between 15-60, and 2 at greater ages. Syphilis caused 208 deaths, 178 or 85.6 per cent. during the first quinquennial period of life, 2 during the second, 25 or 12.0 per cent. between 15-60 years, and 3 at greater ages. Erysipelas caused 256 deaths, 90 or 35.1 per cent. of these during the first five years of life, 89 or 34.8 per cent. between 15-60 years, and 72 or 28.1 per cent. at greater ages. Puerperal Fever caused 253 deaths.

278 individuals in every hundred thousand of the population of Scotland, succumbed to Zymotics during 1895, equivalent to 14.10 per cent. of the total specified deaths. In the Principal Town Districts the proportion as above to the population is 324, and to the specified deaths 14.76 per cent.; in the Large Town Districts the ratios are 281 to population, and 14.13 per cent. of the specified deaths; in the Small Town Districts they are 279 per hundred thousand, and 15.03 per cent. of the deaths as above; in the Mainland-Rural Districts they are 198 and 11.54 per cent.; and in the Insular-Rural Districts 221 in every hundred thousand of the inhabitants so died, equal to 14.44 per cent. of the total specified deaths in the same.

Tables XXX. and XXXI. give similar information as to the Principal Towns. Thus in Glasgow 322 deaths occurred during the year from Zymotics in every hundred thousand of its inhabitants, equal to 13.70 per cent. of the total specified deaths. Hooping Cough accounts for 90 of this, Diarrhœa and Dysentery for 66, Measles for 48, Scarlet Fever for 26, Influenza for 20, Fevers for 19 (18 Enteric), Diphtheria for 16, and Small-Pox for 3.

In Edinburgh the proportion is 333 to each hundred thousand of population, or 16.06 per cent. of the specified deaths. Measles accounts for 94 of this, Influenza for 56, Diarrhœal Affections for 52, Scarlet Fever for 26, Diphtheria for 24, Hooping Cough for 22, Fevers for 21 (20 being Typhoid), and Small-Pox for 6.

In Dundee the rate to population from Zymotics is 253, equal to 11.90 per cent. of the deaths. To Diarrhœa and Dysentery is ascribed 88 of the above, to Hooping Cough 58, to Measles 21, to Influenza 19, to Diphtheria 16, and to Fevers 13—all Typhoid.

In Aberdeen 388 deaths occurred from the same class of disease in every hundred thousand of its inhabitants, or at a rate of 18.43 per cent. of the total specified mortality. Measles accounts for 136 of this, Hooping Cough for 71, Influenza for 62, Diarrhœa and Dysentery for 53, Scarlet Fever for 23, Fevers for 14 (all Typhoid or Enteric), and Diphtheria for 9.

In Govan and Partick the mortality rate to its population as formerly is 212, equal to 11.90 per cent. of the total mortality. Hooping Cough accounts for 71 of this, Diarrhœal Affections for 49, Measles for 32, Influenza for 21, Diphtheria for 16, Scarlet Fever for 7, and Fevers for 4 (3 Enteric and 1 Cerebro-spinal).

In Leith the death rate from Zymotics was 413 per hundred thousand of its population, equal to 20.31 per cent. of the total specified deaths. Measles accounts for 142 of this, Hooping Cough for 73, Diarrhœa and Dysentery for 45, Scarlet Fever and Influenza each for 31, Diphtheria for 29, Fevers for 19 (5 Typhus and 14 Typhoid), and Small-Pox for 1.

In Paisley 288 is the rate in which such deaths occurred, constituting 13·32 per cent. of all. For 88 of this ratio Measles is accountable, for 82

In Greenock the Zymotic mortality rate is 417 per hundred thousand of population, or 18·08 per cent. of the total deaths. To Diarrhœa and Dysentery 108 of this is credited, to Measles 105, to Hooping Cough 84, to Influenza 32, to Scarlet Fever and to Fevers each 16 (15 of the latter Enteric), and to Diphtheria 10.

In Coatbridge the proportion of such deaths to population is 508, and rate per cent. of the deaths 20·94. Of the former Measles accounts for 191, Hooping Cough for 86, Diarrhœal Affections for 71, Fevers for 49 (3 Typhus, 46 Typhoid), Diphtheria for 43, Scarlet Fever for 28, and Influenza for 22.

In Perth 213 is the rate to population, equal to 10·24 per cent. of all the deaths. To Diarrhœa and Dysentery are ascribed 60 of the former, to Measles 40, to Diphtheria 30, to Fevers 27 (13 Typhus and 13 Typhoid), to Influenza 20, and to Scarlet Fever and to Hooping Cough 3 each.

1875	76		

In Kilmarnock the death-rate from Zymotics was 359 in every hundred thousand of its inhabitants, equal to 17·72 per cent. of all the specified deaths. Diarrhœa and Dysentery account for 102 of this, Hooping Cough for 71, Fevers for 61 (58 Enteric and 3 Cerebro-spinal), Influenza for 54, Scarlet Fever for 24, Diphtheria for 14, and Measles for 3.

47 deaths from Small Pox were registered throughout Scotland during 1895. Of these 33 were of the male sex, and 14 of the female. 28 of the male deaths and 12 of the female are registered in the Principal Town Districts, 1 female death in the Large Town Districts, 4 males and 1 female died in the Small Town Districts, and 1 male in the Mainland-Rural Districts, there being none in the Insular-Rural Districts.

To Measles 2063 deaths are ascribed during the year throughout Scotland, giving a mortality rate of 50 in every hundred thousand of the population, and forming 2·54 per cent. of the total specified deaths; of those 1082 were males and 981 females. The Principal and Large Town Districts show the heaviest mortality rate from Measles, this in the former being 69, and in the latter 61 per hundred thousand of their respective populations. In the Insular-Rural Districts the rate is 1.

Scarlet Fever caused 782 deaths, the mortality rate to every hundred thousand of the population being 19, and forming 0·96 per cent. of the total specified deaths; the males numbered 406 and the females 376. Here, again, the Principal and Large Town Districts present a higher mortality from the same than is the case for the country at large, the rate in both Districts being 22 for the sexes together; the lowest rate is in the Insular-Rural Districts, 3.

Influenza is the cause of 1752 deaths, giving a mortality rate of 42 in every hundred thousand of the population, and forming 2·16 per cent. of all

the specified deaths in Scotland; the males number 776 and the females 976. The districts which suffered most from this cause were the Small Town Districts and both Rural, the rate in the Small Town Districts being 46, in the Mainland-Rural Districts 55, and in the Insular-Rural Districts 125 in each hundred thousand of their respective populations. In each district except the Small Town Districts the female rate is higher than the male.

To Hooping Cough 1948 deaths are ascribed, equal to 47 in every hundred thousand of population, and 2·40 per cent. of all the specified deaths; male deaths 886, female 1062. This disease was a common cause of death in each district, varying from 67 per hundred thousand of the inhabitants in the Principal Town Districts to 21, the lowest in the Mainland-Rural Districts.

Diphtheria was the cause of 744 deaths, being in the proportion to population as above of 18, and forming 0·92 per cent. of the specified deaths; males 373, females 371. The rate in four of the districts does not much differ from the rate for Scotland, the Insular-Rural Districts, however, showing a rate of just half of this.

Continued Fevers caused 792 deaths, equal to 19 per hundred thousand of population, and 0·97 per cent. of all the deaths; males 444, females 348. The large and small town districts are seen to have suffered from Fevers in greater proportion to their populations than either of the remaining three districts; the Mainland Rural Districts come out best in this respect. Typhus Fever caused 34 deaths; Cerebro-spinal Fever 6; Simple or Ill-defined 22; and Typhoid or Enteric 730; the latter equal to 18 per hundred

TABLE XXXVI.—Vaccinations in Scotland, 1885-1895, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each Year.

thousand of population; male deaths 406, female 324, and the same two districts suffered most from Typhoid as they did from fevers generally. Table XXXVII. shows that of the Typhoid deaths 144 occurred in the Rural Districts, and formed 89·44 per cent. of the total Fever mortality in them, while in the Urban Districts 586 deaths are registered from this same, equal to 92·87 per cent. of the whole fever mortality therein. Typhus caused 10 deaths in the Rural Districts and 24 in the Urban.

Diarrhoea and Dysentery caused 2308 deaths, at the rate of 56 per hundred thousand of population, and forming 2·84 per cent. of all the specified deaths; male deaths 1162, female 1146. In the three Urban Districts a distinctly higher mortality rate from these complaints is shown than in the two Rural, the Insular-Rural Districts giving the lowest, 13 per hundred thousand.

Cancer caused 2993 deaths which gives a rate of 73 per hundred thousand of population, and forms 3·68 per cent. of all specified deaths; male deaths are 1119, female 1874. The mortality rate from this disease bulks largely as a cause of death in each district, the highest being 82 per hundred thousand in the Mainland-Rural Districts, the lowest 61 in the Insular-Rural Districts; the corresponding rates in the other Districts are 70 in the Principal and Small Town Districts, and 69 in the Large Town Districts. Tables XXX. and XXXI., which refer to the Principal Towns, show how the highest rate occurs in Edinburgh, where 93 in every hundred thousand of its inhabitants died from Cancer, followed by Aberdeen and Perth each with 90, Dundee with 82, Kilmarnock with 68, Glasgow and Leith each with 67, Paisley with 56, Coatbridge with 49, Govan and Partick with 35, and Greenock with 34.

Diseases of a Tubercular nature caused 10,688 deaths throughout Scotland, equal to 259 in every hundred thousand of the inhabitants and forming 13·16 per cent. of all the deaths; the male deaths are 5408, the female 5280. The rate for Scotland is exceeded in the Principal Town Districts, where it is 302, and in the Large Town Districts, where it is 283 in like proportion, being 245 in the Small Town Districts, 192 in the Mainland-Rural Districts, and 177 in the Insular-Rural Districts. Of this class of disease Phthisis claims by far the greater number of victims, 7688 of both sexes dying therefrom; males 3839, females 3849, together equivalent to 186 deaths in every hundred thousand of inhabitants, and 9·47 per cent. of all specified deaths. As with Tubercular deaths generally, those from

TABLE XXXVII.—Deaths from Fever in 1895.

Relapsing	—	0·00	—	0·00
Cerebro-Spinal	3	1·86	3	0·48
Simple or Ill-defined	4	2·49	18	2·85
ALL FEVERS	161	100·00	631	100·00

Phthisis occur in greatest proportion in the Urban Districts, the rate to population being in the Principal Town Districts 213, in the Large Town Districts 204, in the Small Town Districts 173, in the Mainland-Rural Districts 146, and in the Insular-Rural Districts 150. Of the males who died from Consumption 9·3 per cent. were under 15 years of age, 69·9 per cent. between 15–45 years, and 20·8 per cent. at greater ages; the corresponding rates among the females being 13·9 per cent., 73·0 per cent., and 13·1 per cent. In the Principal Towns this same disease caused a death rate per hundred thousand of the inhabitants of each as follows.—252 in Coatbridge, 239 in Dundee, 229 in Glasgow, 207 in Paisley, 204 in Edinburgh, 196 in Perth, 191 in Aberdeen, 186 in Govan and Partick, 183 in Kilmarnock, 168 in Leith, and 163 in Greenock. *Tabes Mesenterica* caused 971 deaths in Scotland—males, 507, females 464; *Tubercular Meningitis* caused 1254 deaths—males 669, females 585; and *Scrofula* caused 775 deaths—males 393, females 382.

From diseases of the Brain and Nervous System there are 9307 deaths, in the proportion of 226 per hundred thousand of population, and 11·46 per cent. of all specified deaths; males 4643, females 4664. Deaths from this cause are in largest ratio in the Principal and Large Town Districts, being in the former 237, and in the latter 249 to population as above, the corresponding being 224 in the Small Town Districts, 206 in the Mainland-Rural Districts, and 125 in the Insular-Rural Districts. Among the towns Paisley shows the highest mortality rate from these diseases, viz., 305 per hundred thousand of its inhabitants, followed by Perth with 273, Greenock 268, Glasgow 248, Dundee 244, Coatbridge 228, Aberdeen 224, Edinburgh 220, Govan and Partick 203, Leith 181, and Kilmarnock with 179. Among nervous diseases in Scotland, *Apoplexy* causes 3061 deaths, males 1370, females 1691; *Paralysis* 1831, males 846, females 985; *Epilepsy* 280, males 164, females 116; and *Convulsions* 1227, males 697, females 530.

Diseases of the Circulatory System caused 7204 deaths, equivalent to 175 in every hundred thousand of the population, and forming 8·87 per cent. of all deaths, males 3320, females 3884. The mortality rate for all Scotland from these diseases is alone exceeded in the Mainland-Rural Districts, where it is 188, being in the Principal Town Districts 175, in the Large Town Districts 164, in the Small Town Districts 171, and in the Insular-Rural Districts 144—to their respective populations. In the Towns the mortality rate per hundred thousand of the population is 260 in Perth, 213 in Edinburgh, 204 in Greenock, 203 in Dundee, 182 in Aberdeen, 176 in Paisley, 174 in Leith, 160 in Glasgow, 152 in Kilmarnock, 117 in Coatbridge, and 109 in Govan and Partick.

Diseases of the Respiratory Organs, other than Phthisis, account for

TABLE XXXVIII.—Monthly Deaths from Fever in Eight of the Principal Towns of Scotland during the Ten Years 1886–1895; specifying those from Typhus and Enteric Fever.

MONTHS.	Total Fever Deaths.	Typhus.	Enteric.	MONTHS.	Total Fever Deaths.	Typhus.	Enteric.
January .	231	28	196	July .	194	30	152

16,230 deaths, being in the ratio of 394 in every hundred thousand of the inhabitants of Scotland, and equal to 19·98 per cent. of the total specified deaths; males 8224, females 8006. In the case of these affections the Principal Town Districts alone show a heavier proportional mortality than that for the country, *viz.*, 511. In the Large Town Districts the rate to population is 393, in the Small Town Districts 317, in the Mainland-Rural Districts 278, and in the Insular-Rural Districts 212. The proportion of these same deaths to the total deaths in each district is 23·30 per cent. in the Principal Town Districts, 19·72 per cent. in the Large Town Districts, 17·07 per cent. in the Small Town Districts, 16·20 per cent. in the Mainland-Rural Districts, and 13·88 per cent. in the Insular-Rural Districts. Among the Towns, in Glasgow 6·28 deaths in every hundred thousand of its estimated population are due to Diseases of the Respiratory Organs other than Phthisis, or 26·73 per cent. of the specified deaths in the same; in Greenock these ratios are 490, or 20·02 per cent.; in Govan and Partick 475, or 26·72 per cent.; in Coatbridge 474, or 19·54 per cent.; in Dundee 463, or 21·80 per cent.; in Paisley 443, or 20·49 per cent.; in Edinburgh 416, or 20·02 per cent.; in Leith 408, or 20·04 per cent.; in Perth 386, or 18·56 per cent.; in Aberdeen 368, or 17·47 per cent.; and in Kilmarnock 332, or 16·39 per cent. Bronchitis caused a total of 8202 deaths in Scotland, males 3811, females 4391; Pneumonia a total of 5606, males 3157, females 2449; and Croup 516 in all, males 289, females 227.

From Diseases of the Digestive System a total of 5759 deaths is registered, equal to 140 in every hundred thousand of population, and forming 7·09 per cent. of all the specified deaths in Scotland, males 2919, females 2840. The mortality rate from this class of diseases is heaviest in the Principal and Small Town Districts, being in both 148, when as heretofore computed to the number of inhabitants; in the Large Town Districts it is 138; in the Mainland-Rural Districts 124; and in the Insular-Rural Districts 92. In the Principal Towns and in the like ratio to their populations the rates vary as follow:—In Kilmarnock being 247, in Coatbridge 191, in Greenock 163, in Glasgow 159, in Aberdeen 154, in Paisley 147, in Govan and Partick 140, in Dundee 136, in Edinburgh 123, in Perth 117, and in Leith 108. Enteritis caused 1621 deaths; Peritonitis 766; Hernia 165; Liver Diseases 776; Ileus, Stricture of the Intestine, and Intussusception together 437.

TABLE XXXIX.—The Twenty-three most fatal Causes of Death in Scotland in 1895, arranged in the order of their fatality.

DISEASES.	Proportion of Deaths to 100,000 living.	DISEASES.	Proportion of Deaths to 100,000 living.
Bronchitis	199	Hooping-cough	47
Phthisis	186	Paralysis	44
Diseases of Heart, &c.	175	Influenza	42
Pneumonia	136	Enteritis	38
Age	113	Tubercular Meningitis	30
Apoplexy	74	Convulsions	30
Cancer	73	Tabes Mesenterica	24
Atrophy and Debility	63	Scarlet Fever	19
Developmental Diseases of Children	60	Serofula	19
Diarrhoea and Dysentery	56	All Liver Diseases	19
Measles	50	Diphtheria	18
		Enteric Fever	18

To Diseases of the Urinary Organs 1993 deaths are due, a rate equal to 48 in every hundred thousand of the inhabitants, and 2·45 per cent. of all

Bladder and Prostate 341; while 348 are due to other affections of the same system not specially differentiated.

Diseases of the Organs of Generation or Reproduction caused 585 deaths, or 14 per hundred thousand of the population, and 0·72 per cent. of the specified deaths, males 21, females 564. To Ovarian Disease 72 deaths are ascribed, and to Uterine Affections 110. Diseases incidental to Parturition, other than Puerperal Fever to which 253 deaths are due, cause 355, together giving a total of 608.

To Diseases of the Organs of Locomotion—of the Bones and Joints—442 deaths are due, equal to 11 in every hundred thousand of population, and 0·54 per cent. of the specified deaths, males 264, females 178; and from Diseases of the Integumentary System 233 deaths occur, males 131, females 102.

From Developmental Affections, not including Old Age, there are 2481 deaths, males 1417, females 1064, of which Premature Birth accounts for 2039; Atelectasis for 159; Cyanosis, Spina Bifida, and other Congenital Affections for 158, males 125, females 33.

In all Scotland the deaths of 1731 men and 2910 women are ascribed to Old Age, being at the rate, when combined, of 113 in every hundred thousand of the population, or 5·71 per cent. of all the specified deaths. Thirty-four of the male deaths, and 101 of the female deaths, registered during the year occurred between the ages of 95 and 100 years. One man and nineteen women were *at*. 100 years or upwards at death. The man was a pensioner dying *at*. 100. Eight of the women were between 100 and 101 years, five of those being widows. The daughter of a gardener was 101 at death, while a domestic servant and a pauper were each 103. Two widows and two spinsters, both of the latter domestic servants, were 104, a widow and two domestic servants were 105, and the widow of an agricultural labourer was registered as having attained the age of 109 years at her death.

From Violence 2963 deaths occurred, equal to 72 in every hundred thousand of the population of Scotland (male rate 107, female 39), or 3·65 per cent. of all the deaths; males 2128, females 835. Accident or Negligence accounts for 2674 deaths; males 1932, females 742. Those due to violence other than accident are 289; males 196, females 93, and of those 23 are Homicidal, and 266 Suicidal; the male suicides 186, the female 80.

Of the Accidental deaths 160 occurred in Mines and Quarries, 296 deaths were caused by Railways or by other Vehicles, or by Horses; males 258, females 38. Burns and Scalds account for 346; males 153, females 193. Machinery Accidents caused 31 deaths. Drowning caused 493 deaths; males 447, females 46, over and above 66 Suicidal deaths from the same. Suffocation caused 329 deaths; males 181, females 148 (of those 209 occurred in bed). Poisons caused 84 accidental deaths; males 55, females 29, besides which there are 27 due to Suicide.

The poisons which caused death accidentally are Aconite Liniment in the case of 3 females; Alcohol in the case of 1 male and 1 female; Ammonia, of 1 female; Arsenic, of 1 male; Binoxalate of Potash, of 1 female; Carbolic Acid, of 2 males and 1 female; Carbonic Acid Gas, of 2 males; Carbonic Oxide, of 1 male; Chloral Hydrate, of 1 male; Chloroform, of 13 males and 3 females; Coal Gas, of 7 males and 3 females; Cocaine, of 1 female; Corrosive Sublimate, of 1 female; Hydrochloric Acid, of 1 male; Laburnum Seeds, of 1 male; Laudanum, of 5 males and 5 females; Lead, of 1 male and 1 female; Morphia, of 2 males and 1 female; Narcotic Poison, of 1 male;

Opium, of 6 males and 3 females; Paraldehyde, of 1 male; Phosphorus, of 1 male and 1 female; a Ptomaine, of 1 male; "Smoke," of 1 female; Sting of a Wasp, of 1 female; Sulphurated Hydrogen Gas, of 1 male; while the special poison is not stated in the case of 6 males and 1 female.

The poisons by which Suicide was effected are Arsenic, which was taken by 1 male; Binoxalate of Potash, by 1 female; Carbolic Acid, by 3 males and 2 females; Chloroform, by 1 male; Hydrochloric Acid, by 1 male; Hydrocyanic Acid, by 2 males; Laudanum, by 5 males and 1 female; Opium, by 2 males and 1 female; Oxalic Acid, by 1 male; Strychnia, by 3 males; and in the case of 2 males and 1 female the poison taken is not stated.

Table XXXIX*a* shows the deaths from Suicide and the methods by which it was accomplished. Thus, in Scotland, 7 males and 4 females committed suicide on railways; 17 males and 2 females shot themselves; 38 males and 15 females so cut or stabbed themselves that they died; 10 males and 8 females threw themselves from a height; 40 males and 26 females drowned themselves; 49 males and 18 females hung themselves; 21 males and 6 females took poison; and 4 males and 1 female made away with themselves in some other or not stated manner. 70 of the male suicides and 37 of the female occurred in the Principal Town Districts; 25 of the male and 10 of the female in the Large Town Districts; 33 of the male and 17 of the female in the Small Town Districts; 54 of the male and 16 of the female in the Mainland-Rural Districts; and 4 of the male in the Insular-Rural Districts.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are extracted from the Notes made by Dr Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Quarterly Reports:—

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1895, compared with the Mean of the Ten Years 1881-1890.

YEAR 1895.				1881-1890.	
MONTHS.	Mean Temperature.	Actual Deaths.	Proportion to 12,000 per Annum, or 1000 per Month.	Monthly Proportion of Deaths.	Mean Temperature.
January	30·8	7758	1137	1157	37·5
February	29·0	8924	1308	1052	37·9
March	39·6	9437	1383	1139	38·9
April	45·1	7619	1117	1052	43·1
May	51·8	6613	969	1031	49·0
June	55·0	5759	844	941	54·1
July	55·5	6215	911	916	56·5
August	57·8	5671	831	882	55·7
September	57·2	5612	823	847	52·6
October	42·8	6079	891	911	46·3
November	41·8	5937	871	960	41·4
December	37·4	6240	915	1112	37·0
YEAR	45·3	81,864	12,000	12,000	45·8

The outstanding features of the weather of *January* were a greater prevalence of northerly and easterly winds, an extraordinary low mean temperature, and a heavy snowfall, with much drifting in many parts of the country.

The weather of *February* was a continuation, in an intensified form, of the severe weather of the previous month. The unprecedented prevalence of northerly and easterly winds equally marked both months; barometric pressure unusually high, with a range unusually small; a mean temperature even two degrees lower than that of *January*, and with a mean range only once exceeded during the past forty years, and a humidity absolutely lower than that recorded for any winter month during this long course of years.

The weather of *March* was characterised by unusually low barometric pressure, the deficiency from the average being nearly the same at all the large towns; a mean temperature nearly a degree above the average; a rainfall a little above the average; but the number of rainy days showing an excess of six; and wind, both as regards force and direction, nearly the average.

April was characterised by a mean barometer a little under the average, with a range considerably above it; a mean temperature a degree and a half above the average, with its average daily range; a humidity under the average; and a rainfall 21 per cent. less than the average, falling, however, on two days in excess of the average.

TABLE XLI.—Meteorology of Scotland for 1895, deduced from Observations made at 67 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1895, as stated in the Quarterly Reports.

1895.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	YEAR.

Daily Deaths	250	319	304	254	213	192	200	183	187	196	198	201	224

May was characterised by a high barometer, with a range much below the average; a high temperature, with an extraordinary high mean daily range; a humidity under the average; a rainfall 66 per cent. under the average, and falling four days fewer than the average.

June was characterised by a high barometer, with a range greater than the mean; a temperature about a degree above the average, and a mean daily range unusually large; a very low humidity; and a rainfall 13 per cent. under the mean, falling on the average number of days.

July was characterised by a pressure, and range of pressure, both considerably under the average; a temperature a degree under the average, with a mean daily range only a little under the average; a humidity under the average; and a rainfall 40 per cent. above the average, with three days of rain more than usual in July.

August was characterised by a barometric pressure and range considerably under the average; a mean temperature rather high, with a mean daily range unusually small; a marked prevalence of southerly winds; and a heavy rainfall, which fell on a larger number of days than on any previously recorded August.

September was characterised by a rather high barometric pressure and rather low range; a very high mean temperature, having during the last forty years been exceeded only by September 1865, whose mean temperature was 58°·5; a very high mean daily range; an excess of southerly winds and calms; an unusually small rainfall, which fell on five days fewer than the average.

October was characterised by a barometric pressure a little under the average, with a monthly range slightly above it; a very low mean temperature, with a mean daily range about a degree above the average; an unusual predominance of northerly winds; and a rainfall, as regards the amounts, most unequally distributed among the eight towns.

TABLE XLII.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Diseases, in Eight of the Principal Towns of Scotland, during each Month of the Year 1895.

November was characterised by a barometric pressure a little under the average, but a monthly range considerably above it; a mean temperature above the average, with the nights relatively colder than the days; a large predominance of E. and S.E. winds; and a rainfall nearly an inch above the average, falling, however, on five days more than the mean of the month.

December was characterised by an unusually low barometric pressure, with the mean range of the month, a mean temperature, daily range of temperature, and humidity slightly under the average; an excess of seven days prevalence of east and south-east winds, and a rainfall 9 per cent. above the average, falling on two days above the average.

Tables XL. and XLI. give some information as to the varying meteorological conditions throughout Scotland, with the mortality corresponding thereto. The first of these tables gives the mean temperature for each month of the year, and for the sake of comparison the like for a decennial period is placed alongside.

The mean temperature of the last month of 1894 was $39^{\circ}6$, that of January 1895 was $30^{\circ}8$, a great fall which is continued during the succeeding month of February, when it is $29^{\circ}0$. After this the rise during each month is constant until September, the mean temperature of which, $57^{\circ}2$, is a little under that of August; and after which, until the end of the year, the fall steadily continues. The mean temperature for the twelve months is $45^{\circ}3$.

Table XII. shows how, in a very consistent manner, the mortality is heaviest during the colder and more inclement months than during the milder, inasmuch as 9.47 per cent. of the deaths were registered during January, 10.91 per cent. during February, 11.53 per cent. during March, 9.31 per cent. during April, 8.08 per cent. during May, 7.03 per cent.

TABLE XLIII.—Deaths, Temperature, and Fall of Rain in Eight of the Principal Towns of Scotland during each Week of the Year 1895; also the Proportion of Deaths to every Thousand of the Population.

during June, 7.59 per cent. during July, 6.93 per cent. during August, 6.86 per cent. during September, 7.42 per cent. during October, 7.25 per cent. during November, and 7.62 per cent. during December.

Table XLII. indicates various meteorological conditions, and the monthly relation between these and the deaths from some of the more ordinary diseases as occurring in Eight of the Principal Towns in Scotland. Deaths from diseases of a Miasmatic nature were most frequent during the first four and the last month of the year. Small-pox caused 40 deaths in these towns, some registered in each month, except August, September, October, and December, besides which there were 7 in other parts of Scotland. Measles was especially fatal during the month of January, February, March, April,

TABLE XLIV.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1895, and Proportion at each Age in every Hundred Deaths per Month.

TABLE XLV.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1895.

MONTHS.	Relative Number of Deaths in 1895.					Monthly Deaths proportioned to 1000 per Month or 12,000 per annum.
	0-5 years.	5-20.	20-60.	60 and above.	Total.	
January	1188	240	1005	738	3171	1116
February	1590	271	1401	1257	4519	1591
March	1552	260	1211	1115	4138	1457
April	1129	251	999	651	3030	1066
May	923	263	875	552	2613	920
June	855	211	762	473	2301	810
July	1068	208	737	463	2476	871
August	913	209	650	421	2193	772
September . . .	976	176	722	412	2286	805
October	1007	220	717	479	2423	853
November	906	176	755	575	2412	849
December	981	203	776	569	2529	890
YEAR	13,088	2,688	10,610	7,705	34,091	12,000

and May, the deaths from it falling suddenly in June, and remaining low. During January, October, November, and December, Scarlet Fever was most in evidence; Hooping-cough being most so during February, March, April, and December. Diphtheria claimed most of its victims during the three first and the three last months of the year. Fevers, as a rule, doing so during the latter five months of August, September, October, November, and December. Diarrhœal affections are, as usual, most to be noted as causes of death during the months of July, August, September, and October.

Phtthisis is the cause of 2307 deaths in those towns during the year, a large number occurring each month, those in which the maximum are registered being March, April, and May.

The more acute diseases of the Respiratory Organs are the cause of many deaths, and most marked during the months of January, February, March, and April, those months in which we find the lowest mean temperature, and in which the daily variations are marked. Diseases of the Circulatory Organs, and of the Brain and Nervous System, present similar conditions as regards the number of deaths from the same during the colder and more inclement months of the year.

Tables XLIV. and XLV. are intended to show the mortality as it occurs in these towns at four periods of life, viz., in childhood, during adolescence, among adults and the aged. Thus, among children (0-5 years), 12,810 died during the year, or 38·5 per cent. of all the deaths, those months in which the heaviest mortality occurred being January, February, March, April, July, and October, the months in which Miasmatics and Acute Pulmonary Affections were specially fatal.

Of adolescents (5-20 years), 2634 deaths are registered, or 7·9 per cent. of all, and mostly in the months of January, February, March, April, and May, and probably for the same reason as in the case of children.

Among adults (20-60 years), 10,371 deaths occurred, or 31·1 per cent. of all, and much more marked during the early months of the year than during the later.

Of the aged (over 60 years), there were 7514 deaths, or 22·5 per cent. of all, and here again in greatest numbers during the early and more inclement months of the year, January, February, March, and April, being fewest during the warmer and more genial months of June, July, August, and September.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

APPENDIX TABLES.

APPENDIX TABLES.

VACCINATIONS IN SCOTLAND—1895.

No. of Division, &c.	REGISTRATION GROUPS, DIVISIONS, AND COUNTIES.	Success- fully Vaccina- ted.	Vacci- nation Post- poned.	Insusceptible of Vaccine Disease			Died before Vaccina- tion.	Removed from District before Vaccina- tion, or otherwise unaccount- ed for.	Total Births for 1895.
				On the ground of Constitu- tional Insuscep- tibility.	In respect of the Children having already had Small-pox.	On the ground of previous Successful Vaccina- tion.

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Towns, of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.

N.B.—An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated or are comprised of more, or parts of more, than one Parish, and the component parts of these Districts will be found at page 474.

A dagger "†" is prefixed to those Districts which consist of only a part of a Parish of the same name.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
15	Eday and Pharay	Part of Stronsay and Eday.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
376	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
596	Carnoch	Parts of Contin and Urray.
866	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs and part of Uig.
926	Cannich	Parts of Kilmorack and Kiltarlity & Convinth.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
135	Elgin	Elgin, and parts of New Spynie, and St Andrews-Lhanbryde.
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrinnus	Parts of Aberlour and Mortlach.
167	Seafeld	Parts of Cullen and Rathven.
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth	Parts of Crimond, Longside, Lonnay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone and part of Glenmuick, Tullich, and Glengairn.
222b	Millbrenx	Parts of Fyvie and Monquhitter.
227b	New Pitsligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgue.
272	Arbroath	Arbroath, and part of St Vigeans.
282	Dundee	Dundee, and part of Liff, Benvie, and Invergowrie.
294b	Kilry	Parts of Glenisla and Lintrathen.
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
328b	Ardoch	Parts of Blackford, Dunblane, and Muthill.
330	Auchtergaven	Parts of Auchtergaven and Monzie.
331	Balquhiddel	Balquhiddel, and part of Comrie.
344	Dowally	Part of Dunkeld & Dowally.
349	Dunkeld	Part of Dunkeld & Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Little Dunkeld, Methven, and Monzie.
379	Meigle	Meigle and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and parts of Kinnoall and Scone.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol and Moulin.
402	Anstruther-Easter	Anstruther-Easter and part of Kilrenny.
417	Craill	Part of Craill and May Island.
423	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino and part of Craill.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorn.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
490	Stirling	Stirling, and part of St Ninians.
496	Dumbarton	Dumbarton and part of Cardross.
506	Ballachulish, etc.	Part of Kilmallie.
509	Cumlodden and Minard	Parts of Glassary and Glenarary.
513	Inveraray	Inveraray and part of Glenarary.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan etc.	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
525	Lismore	Lismore and Appin, and part of Kilmallie.
526	Lochgilthead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardochattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Pennygown and Torosay.
547	Portnahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
556	Lochranza	Parts of Kilbride and Kilmore.
557	North Bute	North Bute, and part of Rothesay.

* The actual number of Districts is 1056—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.
